Firebase

Java

JDBC

Problem Solving

Git

Github

PROJECTS

Personal Portfolio website

HTML | CSS | Javascript | Typed.js | Tilt.js | Swiper.js

- Created a fully responsive website to showcase all my personal and professional information.
- The website includes details about my experience, skills, achievements, and education.
- Integrated js libraries for typing effect, tilt effect and cool image sliders.
- <https://vishnu-kumar.netlify.app>

My-Notebook

React js | API

- Integrated authentication for users and provided them with a secure platform to add, store, update, and delete their notes using an API I created.
- The notes are stored in a MongoDB database, ensuring data integrity and security.
- This feature enhances the user experience by providing a reliable and secure service that keeps their data safe.

News App

React js | News API

- Developed an app using News API that displays news from all over the world, categorizing them into sports, technology, and more.
- The app features a custom loading mechanism and infinite scrolling, ensuring a seamless user experience.
- The app provides users with real-time updates on the latest happenings across the globe.

Amazon clone

Tailwind | React.js

- Implemented a responsive design that adapts seamlessly to different screen sizes.
- Created signin, cart, product-listing and product-details page.
- Added functionality to add/remove products to cart with automatic subTotal calculation.
- <https://complete-amazon.netlify.app>
