I am a highly skilled front-end developer having expertise in HTML5, CSS3, Javascript, Tailwind, and React.js. I've done 6 months of training in Flutter, Dart and Firebase. Additionally, I have hands on Java. I believe my skill and experience are sure to make me an asset to any project or team.
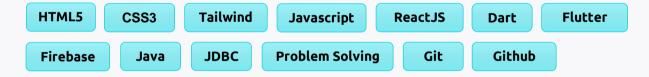

EXPERIENCE

Software Trainee Engineer   (Nov 2022 – April 2023)
Tapasvi Info Solutions

- Developed mobile applications with Flutter, utilizing Firebase for backend integration.
- Improved user experience by leveraging custom UI components and widgets.
- Leveraged Firebase realtime database and cloud functionality to enable real-time chat functionality.
- Demonstrated strong problem-solving skills to address technical challenges and implement innovative solutions for complex features and functionalities.

EDUCATION

- ### Bachelor of Science (CS)   (2019 – 2022)
  Rajiv Academy for Technology and Management, Mathura affiliated to DBRAU, Agra

- ### Intermediate (PCM)   (2017 – 2019)
  Seemax International School, Sasni Hathras (CBSE Board)

- ### HighSchool   (2017)
  Kendriya Vidyalaya Hathras (CBSE Board)

SKILLS

HTML5 | CSS3 | Tailwind | Javascript | ReactJS | Dart | Flutter

Firebase | Java | JDBC | Problem Solving | Git | Github

PROJECTS

Personal Portfolio website
HTML | CSS | Javascript | Typed.js | Tilt.js | Swiper.js

- Created a fully responsive website to showcase all my personal and professional information.
- The website includes details about my experience, skills, achievements, and education.
- Integrated js libraries for typing effect, tilt effect and cool image sliders.
- https://vishnu-kumar.netlify.app

My-Notebook
React js | API

- Integrated authentication for users and provided them with a secure platform to add, store, update, and delete their notes using an API I created.
- The notes are stored in a MongoDB database, ensuring data integrity and security.
- This feature enhances the user experience by providing a reliable and secure service that keeps their data safe.

News App
React js | News API

- Developed an app using News API that displays news from all over the world, categorizing them into sports, technology, and more.
- The app features a custom loading mechanism and infinite scrolling, ensuring a seamless user experience.
- The app provides users with real-time updates on the latest happenings across the globe.

Amazon clone
Tailwind | React.js

- Implemented a responsive design that adapts seamlessly to different screen sizes.
- Created signin, cart, product-listing and product-details page.
- Added functionality to add/remove products to cart with automatic subTotal calculation.
- https://complete-amazon.netlify.app
